

## Police Department – Intelligence and Resources Optimization

**Challenge** Improve public safety while substantially increasing agency productivity

---

Police Departments and Law Enforcement Agencies are currently experiencing complex operational and financial challenges. The system is overburdened with mounting pressures to improve citizen security and to decrease operational costs. This is a difficult task to achieve as crime trends in major cities are increasing.

Smarter and cost-effective ways to resolve criminal cases and to improve internal procedures are key needs.

---

**Solution** Deploy an **emfiva-F/FRS** Multi-biometric ID Management System to:

- Identify duplicate suspect aliases by sanitizing identity data bases
- Resolve crime investigations by generating fresh intelligence leads
- Streamline the overall arrest process to save valuable time

### Tangible Results

#### Attack Crime – Improve Intel

- Mug-shot database cleanse process biometrically identifies 1,000+ aliases.
- Additional 15-20% in crime case resolution rates through link analysis and suspect ID from external images.

#### Gain Productivity – Cut Costs

- Gain 20,000-60,000+ police officer hours per year by cutting the booking process by 30 to 90 min. per incidence.
- Increase public safety rates through greater police presence on the street.

**Improve Public Safety**

**Increase ROI and Reduce Risks**

**Detect Identity Fraud**
